

RHEVISION TECHNOLOGY AWARDED \$1.5 MILLION DEPARTMENT OF HOMELAND SECURITY CONTRACT

SAN DIEGO, Calif. – October 20, 2008: Rhevision Technology, Inc., a leading optics company that has developed and manufactured the world’s most powerful fluidic lens, announced today it has signed a \$1.55 million contract with the U.S. Department of Homeland Security. “This contract provides additional confirmation of the importance of Rhevision’s miniature tunable lens technology” said Gary Shields, Chairman, President and CEO of Rhevision. “The contract is synergistic with the company’s strategy to integrate its lenses into products in large targeted markets” Mr. Shields added.

The San Diego, California based company said for security reasons, it would not disclose additional details about the work being done pursuant to the contract. The contract covers 18 months of work.

About Rhevision

Rhevision Technology, Inc., founded in 2006, is a premier optical technology company located in San Diego, California. Rhevision invented and has developed the most advanced liquid lens based Miniature Tunable Camera Lenses (MTCL’s). Our products include both fixed and >3x optical zoom and auto-focus lens systems targeting multiple billion dollar high-growth markets such as security devices, digital still cameras, handheld devices and video conferencing. The company is managed by a team of highly experienced and innovative technical and business professionals, and is funded by In-Q-Tel, EDF Ventures, and various individuals.
